

FAHED JIHA

COMPUTER ENGINEERING CANDIDATE | IT, EMBEDDED SYSTEMS & SOFTWARE

Miami, FL | 305-927-8003 | fjiha001@fiu.edu | linkedin.com/in/fahed-j-37849b253

PROFESSIONAL SUMMARY

Computer Engineering student and IT / Systems Engineer with hands-on experience in business technology support, embedded systems, FPGA design and SoC coursework, Python and C++ development, electronics repair, and consultative sales. Builds practical automation and IoT solutions and is known for methodical troubleshooting, clear communication, and translating technical requirements into reliable results.

EDUCATION

Florida International University - B.S. Computer Engineering

Expected Spring 2027

Miami, FL | Minor in Mathematics | GPA: 3.7

Broward College - Associate of Arts

Spring 2023

TRIO Mentorship Program

TECHNICAL SKILLS

Programming: Python, C++, C, Arduino C++, Java, HTML, CSS, JavaScript, PowerShell

Embedded / Hardware: ESP8266, Arduino, MQTT, DHT22, RIMS, FPGA, Zybo Z7, Vivado, Vitis, VHDL, AXI GPIO, CircuitVerse

Systems / Support: Windows, AutoCAD (basic), Visual Studio, PyInstaller, PyMuPDF, Microsoft Office, ServiceNow, Zendesk, TCP/IP, DNS, DHCP

Languages: English, French, Haitian Creole

ENGINEERING PROJECTS

Floorplan Reader - Python Desktop Application

2026

- Developed a desktop tool that parses construction-plan PDFs, identifies sheet-index and title-block data, classifies nine drawing categories, and exports review packages with JSON manifests.
- Packaged a Windows executable with PyInstaller and built a correction-memory pipeline; verified core behavior with 12 passing automated tests.

ESP8266 MQTT / Losant IoT Telemetry

2025

- Programmed NodeMCU firmware to interface buttons, LEDs, and a DHT22 sensor, connect over Wi-Fi, and publish temperature and humidity measurements to a Losant dashboard.
- Implemented device-state reporting, remote LED command handling, reconnect logic, serial diagnostics, and credential-safe portfolio copies.

Everglades Rescue Game - C++ Group Project

2024

- Collaborated on a 5x5 matrix-based rescue game with randomized hazards, adjacent-movement validation, combat/wait decisions, and a 12-gong resource countdown.
- Structured gameplay with reusable menu, rules, map, state, and validation functions; revised source passed C++17 syntax validation.

FPGA Smart Parking & Embedded Systems

2025-2026

- Created RIMS/C state machines for automatic-door control, inactivity alarms, LED sequencing, glitch filtering, sustained-input alarms, and concurrent timed tasks.
- Built and verified a VHDL smart-parking controller for the Zybo Z7-20 with debounced inputs, bounded counting, a self-checking testbench, timing closure, bitstream generation, and successful FPGA programming.

PROFESSIONAL EXPERIENCE

IT / Systems Engineer | Hurricane Windows & Screen

Feb 2025-Present

Miami, FL

- Provide day-to-day IT and systems support for business operations, troubleshooting Windows workstations, software, peripherals, user access, and connectivity issues.
- Support construction-document and technical-file workflows while identifying opportunities to improve repeatable processes through software, automation, and clear documentation.

In-Home Technology Expert | Asurion

2022-Dec 2024

Miami, FL

- Delivered in-home support for smartphones, laptops, tablets, and smart-home devices, including hardware/software troubleshooting, system setup, calibration, and data transfers.
- Recommended and sold device-protection and insurance packages, clearly explaining coverage, benefits, and enrollment options while maintaining customer-focused service.

IT Service Technician | uBreakiFix

2020-2022

Pembroke Pines, FL

- Diagnosed, repaired, and calibrated smartphones, tablets, and game consoles using structured troubleshooting and device-specific service tools.
- Managed ticket intake, repair-status communication, inventory organization, and safe workspace practices in a customer-facing repair environment.
